ARE PAT PEOPLE STUPID?

Many Great Men Have Been of Me

than Average Weight. Both the willowy people of the world and those of average weight associate fatness with stupidity, where as often such is not the case. They have been to the shows at country fairs and have seen the obese ladies and the fat men the e displaying their isles? This is a question that is be superabundant collection of adipose tissue, and have gone away with the day by day echoes the despairing proidea that fat people, merely because they are fat, are stupider and more deficient in intelligence than peopla of average avoirdupols, and this, in their opinion on the subject, has extended outside of the shows to apply to fat people generally, says Tit Bits.

At the present moment William Howard Taft is the second fat man sitting in the presidential chair and the first republican of more than average weight to occupy that position, the idea of taking away the property er Cleveland of democratic persuasion.

These are only two men of the pres-

ent time, though Cleveland is dead, having a fine intellect in a body of supernormal weight. Looking into als and on his salary. history we find that some of the finest intelligences the world has ever known have been incased in fleshly caskets plump even to obesity. Napoleon Bonaparte, notwithstanding his active career, was decidedly stout. Dr. Johnson was inclined to flabblness, his dwelling, taxes for lighting, pavwhile Boswell, his biographer was in he same condition.

Honore de Balzac, the great French novelist, was so large that to-day he neight be nicknamed "Jumbo" Balzac; on his carriage. Liuinas pere was stout, while Saintespite of his great corpulency, which he tried to keep down by drinking vinegar, Eugene Sue wrote "The Wandering Jew."

Possini, the composer, was so far that for six years he never saw his knees, and Jules Janin, the prince of critics, broke down all ordinary sofas found gold in the Rocky mountains. he sat upon, his cheeks and chin pro George Jackson is dead and beyond truding beyond his beard and whisk the reach of the honor paid his memers. RICH TAXED OFF THE R

Are the British rich in immediate danger of being taxed off the British ing asked seriously. The British press tests of the well to do against the rapidly increasing burdens of taxation, of which no man knows the end. The prediction is freely made by Englishmen of affairs resident of this country that any substantial increase in taxation will be followed by an exodus of the British well to do, and espe cially of the British rich from the British isles. They will seek in this country or some other a haven where

The Englishman pays a tax when he inherits property. He pays an income tax on his rent

He pays a tax on his automobile. He pays a tax on all stock exchange transactions.

He pays a tax on all his land and on all increase in land values. He pays, in addition to the rent of

ing and police protection. He pays a tax for the privilege of wearing a ring with a crest on it, and a tax for putting armorial bearings

He pays a tax for his carriage, his

"EASY MONEY."

Loss of Self-Respect.

There is no more pernicious sophis-

the seductions of "easy money." The

psychology of this weakness may or

may not go back to the garden of

Eden and the primal curse of toil.

Certain it is that there is an inherent

revolt in human nature against the

drudgery of earning bread in the

sweat of one's brow. Normally con-

structed people combat this rebellious

spirit through the human affections

which ennoble toil and consecrate the

hardest tasks to the comfort of loved

ones. But there are few people who

work very hard for the sheer love of

hardest in the world; it is gained at

a fearful price, whether it is the booty

of the highwayman or the unearned

INCOME TAX.INHERITANCE TAX AND EVERY OTHER SORT OF TAX MAY DRIVE JOHN BULL FROM

He pays a tax for the privilege of shooting game.

He pays a tax on every servant. He pays a tax when he dies-or his state does and leaves property.

"Americans have little idea of the England," says a writer on the subject. "If you are a renter and pay, say \$300 a year rent, you would be obliged to pay not less than \$90 addithe first fat man being Stephen Grov- of those who have it to give it to tional, which would cover the lightthose who have none does not obtain. ing. paving and police protection. But richer people are caught in all sorts of ways. For instance, in England I would pay \$5 a year for the privilege of wearing this ring. It carries a crest and if I had a carriage with armorial bearings upon it I would be obliged to pay \$10 a year for that privilege. When a man dies his estate must pay a tax of 1 per cent on everything, if his estate is below \$2,500 in value; 2 per cent on \$5,000, 3 per cent on \$50,000, 4 per cent on \$125,-000, 41/2 per cent on \$200,000, 5 per cent on \$225,000, 51/2 per cent on \$500,-000, 6 per cent on \$750,000, 7 per cent on \$1,250,000, 8 per cent on \$2,500,000. cent on \$5,000,000.

"Perhaps the greatest burdens which the land owner is subject to are on account of the poorhouses. which are maintained at great expense, and on account of the new poltey of old age pensions; that is, penvarious taxes that are imposed in sioning any one over a certain age who hasn't an income of \$2.50 a week. The great question that is being considered in England apparently is not what to do with the unemployed, but with the unemployable. The people who have saved money and have made the most of their opportunities apparently will be obliged to take care of those who have not taken care of driven out of the country. The bankthemselves and who never could take care of themselves."

The amount of the graduated death in the United Kingdom, which has a population of 44,000,000 and upward. 000 annually out of a total internal revenue of \$470,000,000 to \$480,000,-000. It is drawn from more than 67, 000 estates. The revenue from the death dues is a little more than half that from excise imposts, and consid-9 per cent on \$3,750,000, and 10 per erably more than half the amount realized from the income tax.

tributes to the duties is varied, but agricultural land furnishes less of the total than household property and business premises. For 1908 the net value of household property and business premises was £28,137,000, while in agricultural land it was a triffs under £17,000,000. Leaseholds were valued at £9,100,000 and ground rents at £3.845.000. Other items exceeding £1,000,000 were building lands; mines, minerals and quarries; cessers of annuities, and sporting rights. Real estate not classified was a fraction under £2,000,000.

Owners of big properties alone will not suffer. The great landlords, it is predicted, will promptly advance rents and stop all improvements and construction. Financial opinion is upantmous that enormous sums will be ers and big houses which float government and other foreign loans say that the new tax on such transactions duties, or inheritance taxes, collected covers the entire margin between profit and loss and that such deals hereafter will go to Paris. New York ranges from \$90,000,000 to \$95,000, and Amsterdam. The New York stock exchange, it is said, will profit materially. There has been large speculation in American securities in England, but the bulk of that business hereafter will be transacted in New York to escape the English stamp tax. The effect of some of the other new taxes is problematical.

HOW THE WRIGHT AIRSHIP IS STARTED.

The Wright airship has no wheels, but a set of wooden runners like a sleigh. These travel upon a rail, and the initial impetus is given to the machine by the release of a weight which runs over a pulley in a wooden tower. The descent of the weight makes the airship fly off in a direction away from the tower. The impetus causes it to rise a little, and afterward the screws and planes keep it affoat.

penitentiary doors may not swing shut proaching me. If I couldn't do that, on either. But the price must be paid all the same paid in the coin of the soul, in peace of mind and loss of selfrespect, and in a thousand ways in which our human nature, even while it yields to evil, yearns for the eternal good and stretches its hands upward, no matter how low it may have fallen.

HUNGRY AND DIRTY.

Condition Which Will Quickly De-

moralize the "Down-and-Out." "I'll tell you what puts a man in the 'down and out class,' " said a western man who has been retrieved from the Bowery, according to the Cincinnat! Times-Star's New York correspondent. It is the impossibility of keeping clean when you're out of money. I went broke six weeks ago, over in Jersey, and came to New York, thinking I could catch on here. The few dollars I had melted away, I had found no job and I had to hit the bread line. Then my real troubles commenced.

"It wasn't that I didn't have enough to eat or a place to sleep. I could stand that. But I couldn't get a bath. A week of that sapped my selfrespect. I began to slink along the street, instead of walking. Whenever I could, I dodged down a side street set reach the sinner, rich or poor; the to avoid meeting any one 1 saw ap Chicago Record-Herald.

I got my head down and faced the wall. I loathed myself-but what could I do? You can't bathe in the bay this sort of weather, and on the Bowery you don't get a room with a bath when you panhandle a dime from some one for a pallet in one of the filthy holes they call lodging houses.

"I've got a job now, and I hope to keep it. I'm working as I never did in my life before, for while I'm not afraid of starvation and hardship, i am sincere in saying that I had rather die than go without bathing for three weeks, under the conditions that the 'busted' man meets on the Bowery. The bread line saved my life-or kept me from resorting to theft and highway robbery-just as it has thousands of others every winter. But if the bread liners were enabled to keep themselves clean, our army of 'down and outs' would be reduced in a hurry. I know. If you're hungry and clean you're a self-respecting man. If you're hungry and dirty, you're a bum, and you know it."

Almost Got It. "Is there any difference in the meaning of the words 'nautical' and 'marine?" asked Mr. Malaprop. "Not much," replied Mrs. Malaprop. "One is a cinnamon of the other."-

COMMERCE AND INDUSTRY.

Excerpts Made from Trade Reports of Various Countries.

Beigian works are getting large orders for steel rails from Brazil, Sweden, the Kongo and other countries, also for bolts and metal ties, says the New York Sun.

The rubber industry in Mexico is not as profitable as was expected. Inside of a few years the far east will have 60,000,000 para trees producing from one to three pounds a year of rubber superior to the best Mexican grades. Fewer trees produce more rubber in the far east.

The study of English has been made compulsory in the primary schools of Gautamala.

In 1908 there were organized in Austria thirty-five joint stock companies, with \$15,590,000, about half the 1907 record in number and amount.

Italian imports of American goods in the nine months ended March, 1909, reached a value of \$47,278,791. or \$6,215,000 more than in the nine months ended March, 1908. Argentina's imports were \$25,484,817, an increase of \$1,149,000.

The Swedish government has appointed a tariff commission in preparation for a thorough revision of the tariff in 1910.

July 1, 1909, will begin the enforcement of the new pure-food law in Switzerland. The American meat trade is largely interested, as some of the restrictions are very stringent and the inspection fees may be put far too high.

The Mexican railroad finds its facilities overtaxed to move the importations entering the country at the port of Vera Cruz. Notably among importations the automobile demand in Mexico is shown to be steadily increasing. Taxicabs are a success in Mexico city. All told Mexico bought \$36,897,715 worth of American goods in the nine months ended March, 1909, against \$34,539,937 purchases by Americans of Mexican goods.

Portugal imports yearly from \$60. 000,000 to \$65,000,000 worth of merchandise, of which 6 per cent is American. Six articles-cotton, corn, petroleum, tobacco, wheat and staves -account for all but \$700,000 worth of the American goods imported. That \$700,000 is made up of nearly 300 articles, many of which are materials for manufacturing. In manufactures imported the American share is insignificant. Transportation is our handicap besides want of knowledge of the Portuguese market. American letters are not infrequently addressed 'Lisbon, Spain." Tariff rates are high,

Where Shark Ment Is Enten.

In Italy is regularly served a fist, food which Americans discard through ignorance and prejudice. In Rome the shark finds a ready sale at the price of 8 cents a pound. The color of the meat resembles that of the shad, but is of firmer consistency and has comparatively few bones. The shark is plenteously distributed up and down our coasts from Maine to Panama throughout the year, and is as palatable as the sturgeon or halibut. But it is systematically cast away at every haul of the net by the dory man of the deep water fishing smack,

Grown-Up Children.

It is not only the frivolous whon, the spirit of childishness is just now leading astray. Silliness is the fashion even among the wise. Women especially affect a kin of childish shrewdness in talking on serious subjects. Like children who have the habit of romancing, they lose the sense of reality, and because they never talk exactly as they think they begin to think exactly as they talk .-London Spectator.

Fooled the Baby. Hewitt-Ooes your baby keep you

awake? Jewett-No, I fooled him; as soon as he was born I got a job working
